

TRINNY & SUSANNAH

Magic Shapewear Range

**Correct Fitting of all High-Waisted Garments:
Bum, Tum & Thigh Reducer, All in One Body Smoother, All in One Body Shaper,
Magic Tummy Flattening Brief, Magic Shaping Tights**

Refer to this image for the correct method of fitting the Bum, Tum & Thigh Reducer, which applies to all high-waisted garments in this range.

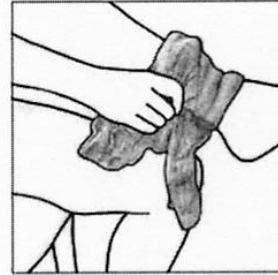

How to put on your BUM, TUM & THIGH REDUCER

1. Make sure size lines are visible at the back of the knicker.

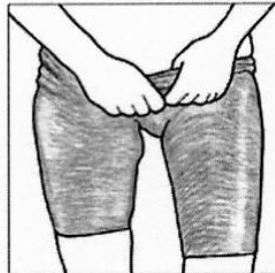

2. Gather one leg in your hands.

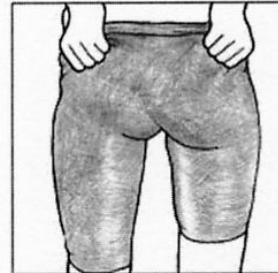

3. Sit down and pull on both legs.

4. Pull up to knees.

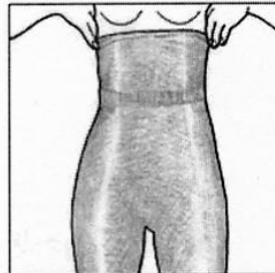

5. Stand and pull up to crutch until garment meets crutch.

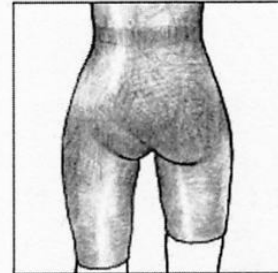

6. Make sure bum is snugly fitted.

7. Pull down leg.

8. Pull up to under bra strap and waist mark is at your waist.

9. Make sure all is snugly fitted.

Size guide: Small 2 lines, Medium 3 lines, Large 4 lines, X Large 5 lines, XX Large 6 lines.

Ensure that your customer positions the “lifting” bands at the rear of garment correctly (i.e. just under the curve of the buttocks) **AND** that the ribbed waistband is at least at belly-button level or higher **AND** that there is sufficient fabric to easily reach the underbust area.

Correct Size gives Best Results

"Rolling down" may be an issue for women that are buying the incorrect size - if a garment is too small, and not hitched up high enough in the crotch area (with the ribbed band being at least at tummy-button level), then the pull of gravity from the bum & thigh area and the traction exerted by the thighs and legs when moving around will result in the garment pulling down. If the garment is the correct size this is not an issue.

Use the hip measurement as the starting reference for all garments that extend to the upper-bust area. For items that terminate at the waist (Magic Bum & Thigh Pants, Magic Tummy Flattener Thong) the waist measurement is more important.

Body Shape

The designers have attempted to design these products to suit as many different body types, shapes and heights as possible. Unfortunately it is not possible to suit every single body.

If your customer is disproportionately larger in her lower body than her upper body she will probably require the next size up. This may result in an excess of fabric in the upper body, but this can be tucked under the bra - excess fabric will not roll down – she will still benefit from the smoothing and control features of the product.

Height in Relation to Size

If your customer could be considered tall in comparison to her dress size or has a long torso, she may also require the next size up to allow sufficient fabric to extend to under-bust area. Similarly, a short person with a short torso may find the upper part of the garment is not as controlling as the next size down.

Trinny & Susannah – Magic Shapewear Fitting Guide

Size	Dress Size	Waist - inches (cm)	Hips - inches (cm)
S	10-12	23-27 (57.5 – 67.5)	34-38 (85 – 95)
M	12-14	27-30 (67.5 – 75)	38-41 (95 – 102.5)
L	16-18	30-33 (75 – 82.5)	41-44 (102.5 – 110)
XL	20-22	33-40 (82.5 – 100)	44-50 (110 – 125)
XXL	24-26	40-46 (100 – 115)	50-55 (125 – 137.5)

Trinny & Susannah – Magic Shaping Tights Fitting Guide

Size	Hips - inches (cm)	Height - feet (metres)
S	34-38 (85 – 95)	4'10"-5'4" (1.47 – 1.62m)
M	36-42 (90 – 105)	5'2"-5'8" (1.57 – 1.73m)
L	40-46 (100 – 115)	5'4"-5'9" (1.62 – 1.75m)
XL	44-50 (110 – 125)	5'5"-5'10" (1.65 – 1.78m)

Country of Origin/Composition (stated on the underside of package)

- All garments are manufactured in Belgium
- Made from 86% Polyamide, 13% Elastane, 1% Cotton (NB: excl. Magic Body Smoother - does not contain cotton as it has no gusset)

Care Instructions

Hand wash or gentle machine wash only, cold water, do not bleach, iron, dryclean or tumble dry

Please ensure that your customers are aware of the care instructions - the Lycra will become damaged by washing it at a too high temperature or with aggressive detergents.

Trinny & Susannah’s Magic Shapewear range is constructed of Meryl® SkinlifE

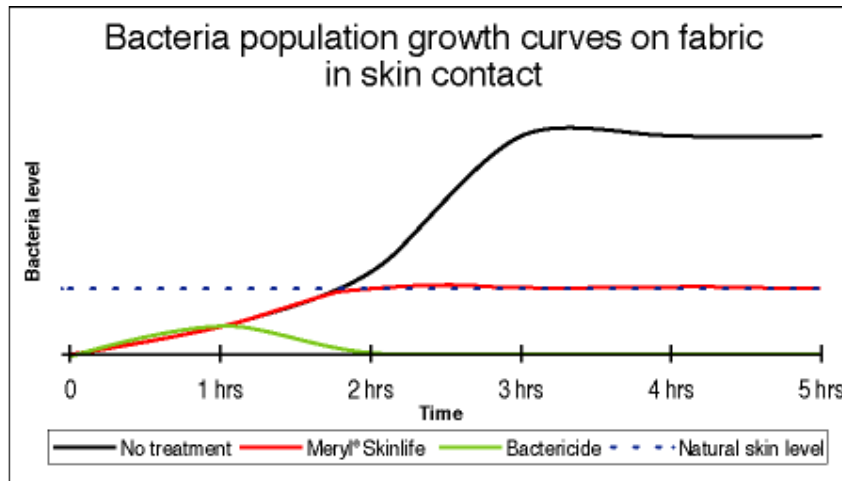

(excluding Magic Shaping Tights)

Meryl® SkinlifE - Antibacterial

The newly developed Meryl® SkinlifE fibre moves the **antibacterial & anti-odour technology** many steps forward. Before, manufacturers were forced to treat the outside of the fibre with an antibacterial fluid that successively disappeared in the wash. **Now the new Meryl® SkinlifE fibre successfully blends silver particles direct into the material, inside the individual fibres.** These silver particles super-effectively defend against the growth of foul-smelling and dangerous bacteria over normal skin levels. And the effect stays put in the wash!

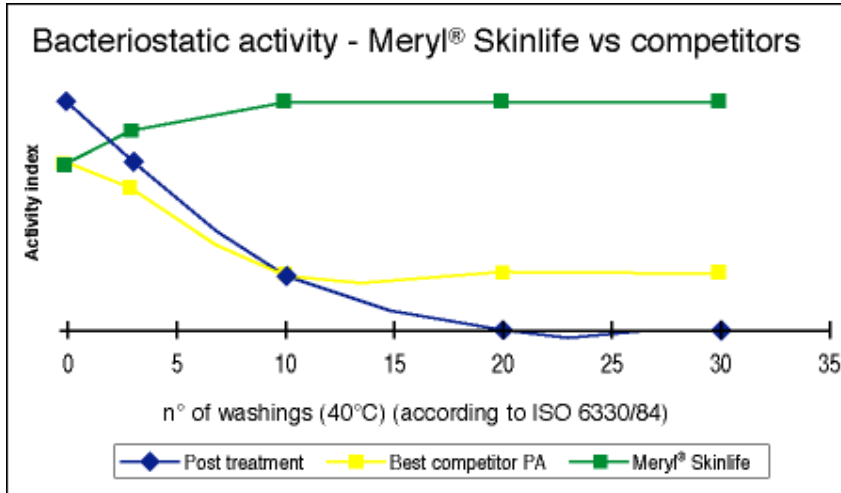

In addition to sensorial and thermophysiological comfort Meryl® also provides biological comfort. The human skin normally has a bacteria presence, but a high level of bacteria, as well as a complete absence, creates various problems (allergy, odor, illness, etc.).

Meryl® SkinlifE is bacteriostatic, a fiber which maintains a natural balance on the skin, regardless of activity level. Thanks to the presence of the exclusive bacteriostatic agent in the polymeric matrix (which is inherent in the fiber...not deposited on the fabric's surface) there is **no migration from fabric to skin (avoiding induction of allergy)**. Meryl® SkinlifE is not a bactericide: it does not decrease the bacteria level lower than what is normally present on the skin.

Due to the bacteriostatic agent present in the polymeric matrix, **Meryl® SkinlifE is a permanent feature in your garment.**

The diagram shows a comparison between Meryl® SkinlifE, and a surface post-treatment normally available on the market, and other kinds of treatment available on nylon filaments.

Meryl® Skinlife has passed successfully oral, skin and eye contact tests and its component, active against the main bacteria's group Gram+ and Gram-, is registered under EPA-TSCA and ELINCS.

Meryl® Skinlife is available in full dull microfibers; is perfect for garments which come in contact with the human body and find its application in sportswear, underwear, socks, hosiery, shoe linings, paramedical fabrics and industrial fabrics (technical fabrics, filters). With the same characteristics and advantages of a Meryl® microfibre yarn - comfort, an incredibly soft touch and high performance - this product has been developed to answer the consumers' demand for quality, durability and practicality regardless of situation.
